Overview

REST APIs provide access to resources (data entities) via URI paths. To use a REST API, your application will make an HTTP request and parse the response. Your methods will be the standard HTTP methods like GET, PUT, POST and DELETE. REST APIs operate over HTTP(s) making it easy to use with any programming language or framework. The input and output format for the REST APIs is [JSON](#).

Getting Started with REST

If you would like to know more about REST in general, start with the Dare Obasanjo's [blog post](#).
